Education

The University of Texas at Dallas

Aug 2023 – May 2027

B.S. in Computer Science, Minor in Visual Arts

GPA: 3.84 / 4.0

Technical Skills

Languages: Java, Python, C++, JavaScript/TypeScript, HTML, CSS, SQL, C

Frameworks/Tools: React, Next.js, Flask, Figma, Git, GitHub

Experience

JPMorganChase

Jun 2026 – Aug 2026

Software Engineer Intern

- Developed a Python and SQL API to ingest, process, and store data from multiple sources, supporting the transition from legacy infrastructure
- Designed API architecture to accommodate additional data sources and improve the extensibility of the data pipeline for future applications
- Implemented frontend enhancements and developed an internal interface for testing API endpoints using React, HTML, and CSS

Projects

Digital News Assistant - *JPMorganChase, Code for Good 2025*

Oct 2025

- Partnered with a team of 6 to build a full-stack web application for the *Black Heart Association*, improving nonprofit client management and communication
- Led frontend implementation using React, HTML, and CSS, developing responsive interfaces and integrating backend services built with Python, Flask, NewsAPI, and BART, enabling live weekly policy updates and automated news summaries
- Delivered a polished final demo to 6 JPMorganChase engineers and a representative of the *Black Heart Association*, showcasing a scalable platform that supports community health initiatives

TalentTrade - *ACM Projects*

Aug 2024 – Nov 2024

- Produced a web app in a team of 4 that serves as an online learning community where university students can exchange knowledge and skills through direct messaging and virtual peer-to-peer lessons
- Spearheaded frontend design and developed overarching aesthetic of the web app using Figma, and implemented fully responsive, animated pages using HTML and CSS
- Utilized React state management and JavaScript to integrate Google Sign-In API and Zoom API for authentication and virtual meeting functionality
- Showcased product with a detailed end-of-term presentation to 5 industry judges, faculty, and other students

EarnNest - *HackUTD 2024: Ripple Effect*

Nov 2024

- Led frontend development in a team of 4, building a website in 24 hours that provides banking services to underbanked communities, implementing Llama AI and Google Cloud OCR to facilitate personalized financial advising
- Created and applied cohesive design system across entire website using Figma, HTML, and CSS, enhancing user experience with intuitive interfaces and a polished aesthetic
- Integrated core functionality and web app flow, including user authentication, Google Cloud OCR, and Llama AI using React and JavaScript
- Presented to 10 industry professionals, earning recognition for frontend design while competing against nearly 280 teams

Awards

ACM Research People's Choice Award

May 2024

National Merit Scholarship Recipient

Mar 2023
